Preface

System/390 has been transformed to an open enterprise server that can be easily integrated in today's global network environment. System/390 offers its legendary strengths--reliability, availability and security. Through the newest technologies, such as CMOS and Parallel Sysplex, these strengths are improved at a reduced cost of computing. Today, the System/390 platform provides the enterprise-wide client/server infrastructure that businesses need for fast and flexible deployment of new applications.

Using this collection, you can put a large number of IBM books online and access them without handling individual sets of books and libraries on many CD-ROMs and tapes.

This edition of the S/390 Redbooks collection include books in BookManager and Portable Document Format (PDF). You still have the ease of viewing the books online using BookManager AND now with PDF the ability to print the books, as well as view them online using the Adobe Acrobat Reader.

The collection consists of bookshelves offering invaluable information and answers on topics such as OS/390 MVS, Parallel Sysplex, hardware, network computing, open client/server, application development and enablement, systems management, security, VSE and many others.

Comments Welcome

Your comments are important to us!

We want our redbooks to be as helpful as possible. Please send us your comments about this or other redbooks in one of the following ways:

- Fax the evaluation form found in "ITSO Redbook Evaluation" on page 85 to the fax number shown on the form.
- Use the online evaluation form found at <http://www.redbooks.ibm.com/>
- Send your comments in an Internet note to redbook@us.ibm.com

Chapter 1. Getting Started with This Collection

This collection contains International Technical Support Organization (ITSO) redbooks that apply to the IBM S/390. It does not contain system center publications or product manuals for S/390 products.

It contains redbooks in BookManager Read Format (BOO) and redbooks in Adobe PDF format along with additional information regarding the ITSO. This collection consist of four CD-ROM's. CD-ROM one and two are in BookManager Read Format. These redbooks are in .boo format and are viewable using the IBM Library Readers which is included in this collection. CD-ROM three and four contain books in PDF format viewable with the Adobe Acrobat Reader which has been included in this collection. In addition to the Adobe Acrobat Reader you must have a web browser capable of frames installed on your computer.

Some of the links in this CD-ROM require you to be connected to the Internet, but the actual redbooks are readable without being connected.

There are a few redbooks in this collection that are only available in one format. A * continues to indicate a new addition to the collection.

1.1 Starting PDF CD-ROM's

If you are running Windows95 or NT and have **autorun** enabled your browser will be launched when you insert the CD-ROM. If your browser does not automatically launch or you are on another operating system, start your browser and open **INDEX.HTM** on the CD-ROM.

Using this collection, you can access a large number of IBM redbooks online without handling individual sets of books and libraries on many CD-ROMs and tapes.

1.2 If You Are New to an IBM Online Library

If you want to set up and use an IBM Online Library on your workstation, you should do the following:

New User:

- 1** Learn about the IBM Online Library. See IBM Online Installing and Using the Online Library.
- 2** Look at the catalog for a detailed list of the bookshelves in this collection.

- 3** Install the library on your workstation. See the IBM Online Library Installing and Using the Online Library, GC31-8311.
- 4** Open the library and list the contents of this collection. See the IBM Online Library Installing and Using the Online Library.
- 5** Learn to use the Library Readers. See the IBM Online Library Installing and Using the Online Library.

Then, you may want to:

- Customize the library on your workstation. See the IBM Online Library Installing and Using the Online Library.
- Share the library with others. See the IBM Online Library Installing and Using the Online Library.
- Expand the library with additional collections. See the file CKITLIST.TXT in the root directory of this CD-ROM for a list of the other collections that are available and the product libraries they contain.

1.3 If You Are Already Using an IBM Online Library

If you already have an IBM Online Library set up and know how to use it, you may want to do the following:

Current User:

- 1** Discover what is new or changed in this collection since the last time it was released.
- 2** Look at the catalog for a detailed list of the contents of this collection.
- 3** If you have centralized your online library, move the new or changed books you want from this collection to your LAN server or host. See the IBM Online Library Installing and Using the Online Library.

Then, you may want to:

- Rerun the IBM BookManager Library Reader Installation Program for OS/2 and DOS or the Installation Utility for Library Reader for Windows to ensure that you have the latest library reader on your workstation. The installation program will tell you if you don't. See the IBM Online Library Installing and Using the Online Library.
- Look at CKITLIST.TXT for new collections that have become available.

1.4 Viewing and Printing Redbooks in PDF Format

With the Adobe Acrobat Viewer, you can view and print the redbooks in PDF file format on this CD-ROM. You can print the books on any workstation printer.

You can view and print these files directly from the CD-ROM, or you can copy these files to your hard disk or server for faster access. Putting them on your server allows you to share them with others.

The Adobe Acrobat Reader is included with this CD-ROM collection. Adobe Acrobat V3.0 or higher is required to view the redbooks in this collection.

If you are using the OS/2 platform of the Adobe Acrobat Reader you should download the Adobe Acrobat Reader for OS/2 Warp to view and print the PDF books. Do not use the Acrobat Reader for Windows on the WIN-OS/2 platform because all of the print fonts used in the PDF books may not be available.

The books all have an extension of **.pdf** with a filename based on the book's order number. For example, a book with an order number of SG24-1234-00 would have a filename of **sg241234.pdf**.

Chapter 2. Catalog for S/390 Redbooks Collection

Note: This booklet is available in an online version in this collection. It has been formatted for viewing by the BookManager Library Readers. You can find it (EZ2RBB81.BOO) in its own bookshelf. It is also available as an ASCII file (README.ENG) in the root directory.

In addition to the BOO. format a number of the redbooks are included in PDF format.

This catalog contains the following:

S/390 Redbooks Online Booklet

The booklet resides on the CD-ROM and contains the complete book list with disc information.

- Complete book list with disc information

Book Lists

What's New to This Collection Booklist

All books are arranged numerically by order number and in the bookshelves alphabetically. Each book list contains the following information:

- The order number of the printed version of each book
- The title of each book
- The file name of each book
- The disc(s) the book resides on

Notes:

1. Sizes are given in megabytes, rounded to the nearest hundredth (1MB = 1 000 000 bytes).
2. The (*) in the first column of the tables identifies the books that are new or changed in this collection.
3. The product books, bookshelves, and bookshelf search indexes in the IBM Online Library, as well as new or replaced IBM redbooks, are given a filename according to the following pattern:

bbbbbbss

Where:

bbbbbb is a six-character identifier for a book, bookshelf, or bookshelf search index. This identifier is always the same for the book to which it is assigned.

ss is a two-digit sequence number that identifies the level of the book, bookshelf, or bookshelf search index. This sequence number changes each time a new level of the book, bookshelf, or bookshelf search index is released.

4. All books in this collection appear in U.S. English.

Appendix A. IBM Redbooks - "How To" Books for IT Pros

Keeping on top of the latest IT trends and products is a challenge uniting all IT professionals. Your firm's IT strategy is constantly evolving. And in each step of this evolution, your job is to "make it work." Why start from scratch? Why not learn from someone who has succeeded at what you're trying to accomplish? Why not subscribe to an IBM Redbook Collection on CD-ROM?

IBM Redbooks are written by an international team of IBM technology pros who are themselves developing, implementing and integrating IBM solutions. These invaluable "how to" books show you the paths and pitfalls so you don't have to find them yourself. If you're searching for a programming command; investigating an emerging technology; or struggling with multi-platform integration; there is an IBM Redbook to help you.

Redbooks cover more than 200 product areas. They're available in three formats--CD-ROM, online or hardcopy. You can order a single book or subscribe to an entire collection of books. IBM's International Technical Support Organization (ITSO) publishes more than 200 new titles each year.

To learn more, visit the IBM Redbook home page on the internet at URL **<http://www.redbooks.ibm.com>**.

You can order redbooks directly through the internet or use the order form in the back of this book.

A.1 Redbook Collections on CD-ROM

CD-ROM Redbooks are great price-performers. They're available as a single purchase or by subscription. The subscription price includes between two and four updates a year for at least 40% off the single purchase price.

When you subscribe to a SBOF, you automatically receive all updates as they're published and save 40% off the single purchase. You can't beat the value of a subscription to a CD-ROM collection

AS/400 Redbooks Collection (SK2T-2849) **AS/400 Redbooks Subscription (SBOF-7270)**

Want to use the AS/400 as a server? Prefer to use the AS/400 as an Internet gateway? Need wireless communication on the AS/400? Want to know all about RISC AS/400 processing? Interested in client access for the AS/400?

Need to understand facsimile for the AS/400? All of these topics and many more are covered in the available AS/400 redbooks.

Subscribe to the IBM AS/400 Redbooks CD-ROM Collection and get two updates a year. The subscription number is SBOF-7270 and the subscription price is \$250.00.

Networking and Systems Management Redbooks Collection (SK2T-6022)
Networking and Systems Management Subscription (SBOF-7370)

Few companies today could survive without networking. Yet how can you understand the complex technologies in this environment? One way is to open *High-Speed Networking Technology: An Introductory Survey*, one of the IBM Redbooks in the Networking Architecture and Standards bookshelf. The Networking and Systems Management Library includes redbooks covering all aspects of networking and systems management; SNA/APPN networks; TCP/IP networks; local and wide area networking; connectivity options for S/390; OS/2; AIX and AS/400; MQSeries; DCE; networking architectures; and systems and network management.

Subscribe to the Networking and Systems Management CD-ROM Collection - SBOF-7370, and get 2 updates per year at a subscription price of \$250 per year.

RISC System/6000 Redbooks Collection (SK2T-8040) HTML & Bookmanager
RISC System/6000 Redbooks Subscription (SBOF-7230)
RISC System/6000 Redbooks Collection (SK2T-8043) PDF Format
RISC System/6000 Redbooks Subscription (SBOF-8700)

The RS/6000 Collection gives you step-by-step instructions on how to maximize your investment in RS/6000 technology. Topics include: how to migrate to the latest AIX release using the Internet and the World Wide Web, AIX storage management, AIX networking and communications, databases, high availability clusters, Lotus Notes, multimedia, and developing object-oriented applications.

Subscribe to the RISC/6000 Redbooks Collection - SBOF-7230 or 8700 and receive 2 updates per year at a subscription price of \$96.00 per year.

Application Development Redbooks Collection (SK2T-8037)
Application Development Redbooks Subscription (SBOF-7290)

Application development tools from IBM offer the most comprehensive coverage in the industry. Products range from legacy languages such as assembler and PL/1 to Object-Oriented COBOL, C++, and Smalltalk in the VisualAge series.

All of the redbooks in the Application Development Collection are "cookbooks" that describe how to bring together and deploy IBM's application development software in your environment-- across platforms and across product areas. This collection covers a wide range of AD topics including architecture and development methodologies, IBM operating systems, languages, client/server, distributed computing and transaction processing. The Internet, Lotus, Windows and 4GL, and other areas are also discussed. Some books offer you an active development environment, such as VisualAge C++ and DB2, through our "try and buy" evaluation copy program.

Subscribe to the Application Development Redbooks CD-ROM - SBOF-7290 and receive two updates a year. The subscription price is \$96 per year.

S/390 Redbooks Collection (SK2T-2177)
S/390 Redbooks Subscription (SBOF-7201)

System/390 has been transformed to an open enterprise server that can be easily integrated in today's global network environment. System/390 offers its legendary strengths--reliability, availability and security. Through the newest technologies, such as CMOS and Parallel Sysplex, these strengths are improved at a reduced cost of computing. Today, the System/390 platform provides the enterprise-wide client/server infrastructure that businesses need for fast and flexible deployment of new applications.

How can you port UNIX applications to MVS? Answers can be found in *Porting Applications to the OpenEdition MVS Platform*, an IBM Redbook on the MVS/ESA Open and Client/Server Bookshelf - just one of the many subject areas in the System/390 Library. Other bookshelves cover such topics as application development, data management, transaction processing, network computing, host systems management, storage management, Parallel Sysplex, and hardware.

The collection consists of bookshelves offering invaluable information and answers on topics such as OS/390 MVS, Parallel Sysplex, hardware, network computing, open client/server, application development and enablement, systems management, security, VSE and many others.

Order a subscription to the IBM S/390 Redbooks Collection CD-ROM - SBOF-7201 and receive four updates a year. The subscription price is \$250 per year.

Tivoli Redbooks Collection (SK2T-8044)
Tivoli Redbooks Subscription (SBOF-6898)

Tivoli's TME 10 Framework implements a powerful architecture that enables cross platform, network-wide management of your network computing environment. Through a common set of interfaces, applications and administrators use this framework to manage systems and applications while providing operating system transparency.

Since the merger of IBM and Tivoli, IBM's system management product set has been integrated with Tivoli's TME 10 solutions. The redbooks in this collection span the entire TME 10 set of products to help you implement these solutions across your enterprise.

Included in this collection is the popular redbook *An Introduction to Tivoli's TME 10*, that provides a great starting point for understanding and positioning the TME 10 architecture and product set.

The first edition of this CD-ROM contains over 30 redbook titles.

Order a subscription to the Tivoli Redbooks Collection CD-ROM - SBOF-6898 and receive two updates a year. The subscription price is \$96 per year.

Transaction Processing and Data Management Redbooks (SK2T-8038)
Transaction Processing & Data Management Redbooks Subscription (SBOF-7240)

IBM's transaction processing and data processing products are world leaders in mission-critical application and client/server support. Today, you can use these products to implement solutions on or across diverse platforms from workstations to mainframes.

Do you need information on designing and managing CICS-based OLTP applications? Would you like to make these applications available to Internet and World Wide Web Users? Are you looking for design and tuning recommendations for DB2 in a sysplex environment? Could you use implementation guidelines on some of the IBM Data Warehouse and Data Mining solutions? The books in this library address all these areas and more.

Subscribe to the IBM Transaction Processing and Data Management Collection CD-ROM - SBOF-7240 and get two

IBM Lotus Redbooks (SK2T-8039)

IBM Lotus Redbooks Subscription (SBOF-6899)

The ITSO announces the first of two editions of the Lotus Redbooks Collection, SK2T-8039-00, for 1998. Since the Lotus merger with IBM in 1995, the ITSO has been working to develop Redbooks to help you work with Notes and Domino and integrate them with enterprise systems.

This CDROM contains redbooks about Lotus Notes/Domino, as well as IBM topics which prominently feature Lotus products. The redbooks include hints and tips, practical examples and often, examples of code. Topics covered include Lotus Notes/Domino application development, administration, enterprise integration, systems management, installation of Domino on specific platforms and other topics. The redbooks in this collection are presented in Adobe Acrobat Portable Document Format (PDF).

Order a subscription to the Lotus Redbooks Collection CD-ROM - SBOF-6899 and receive two updates a year. The subscription price is \$96 per year.

B.1 Terms and Conditions for Items in This Collection

This CD-ROM contains unlicensed books and licensed programs. Before using or copying the books and programs on this CD-ROM, you must first read and agree to the terms and conditions specified for them below. If you do not agree, return this CD-ROM to IBM. By using or copying the books and programs on this CD-ROM, you agree to the terms and conditions and the license agreement.

Note: To display or print the ASCII files, insert this CD-ROM into your CD-ROM drive and use the TYPE or PRINT command with the drive letter of your CD-ROM drive. The following examples assume that the CD-ROM drive on your workstation is D. For example, to display or print the BOOKENG.AGR file, use the following commands:

```
type d:\bookeng.agr | more
print d:\bookeng.agr
```

If your CD-ROM drive is not D, replace the d in the examples with the CD-ROM drive letter for your system.

B.1.1 Using and Copying Unlicensed Books

Unlicensed books on this CD-ROM have order numbers that begin with the letters "G" or "S." The terms and conditions for using and copying the unlicensed books are stated in a file called BOOKENG.AGR on this CD-ROM.

The file is in ASCII format and can be displayed or printed from your personal computer.

B.1.2 Using and Distributing the IBM Library Reader Programs

The terms and conditions for using and distributing the IBM Library Reader programs are stated in a file called PLALRENG.AGR on this CD-ROM. The file is in ASCII format and can be displayed or printed from your personal computer.

B.1.3 Using and Distributing the IBM Softcopy Receiver Tool

The terms and conditions for using and distributing the IBM Softcopy Receiver Tool programs are stated in a file called SCRTENG.AGR on this CD-ROM. The file is in ASCII format and can be displayed or printed from your personal computer.

B.2 README Files for Online Library Components

Before installing or using the following items in the Online Library, consult the README files that are listed for important information and "late-breaking news" that you might need to know. These are ASCII files in the root directory on this CD-ROM.

How to Get ITSO Redbooks

This section explains how both customers and IBM employees can find out about ITSO redbooks, redpieces, and CD-ROMs. A form for ordering books and CD-ROMs by fax or e-mail is also provided.

- **Redbooks Web Site** <http://www.redbooks.ibm.com/>

Search for, view, download, or order hardcopy/CD-ROMs redbooks from the redbooks Web site. Also read redpieces and download additional materials (code samples or diskette/CD-ROM images) from this redbooks site.

Redpieces are redbooks in progress; not all redbooks become redpieces and sometimes just a few chapters will be published this way. The intent is to get the information out much quicker than the formal publishing process allows.
